

Main content area where the key visual should appear along with call to action

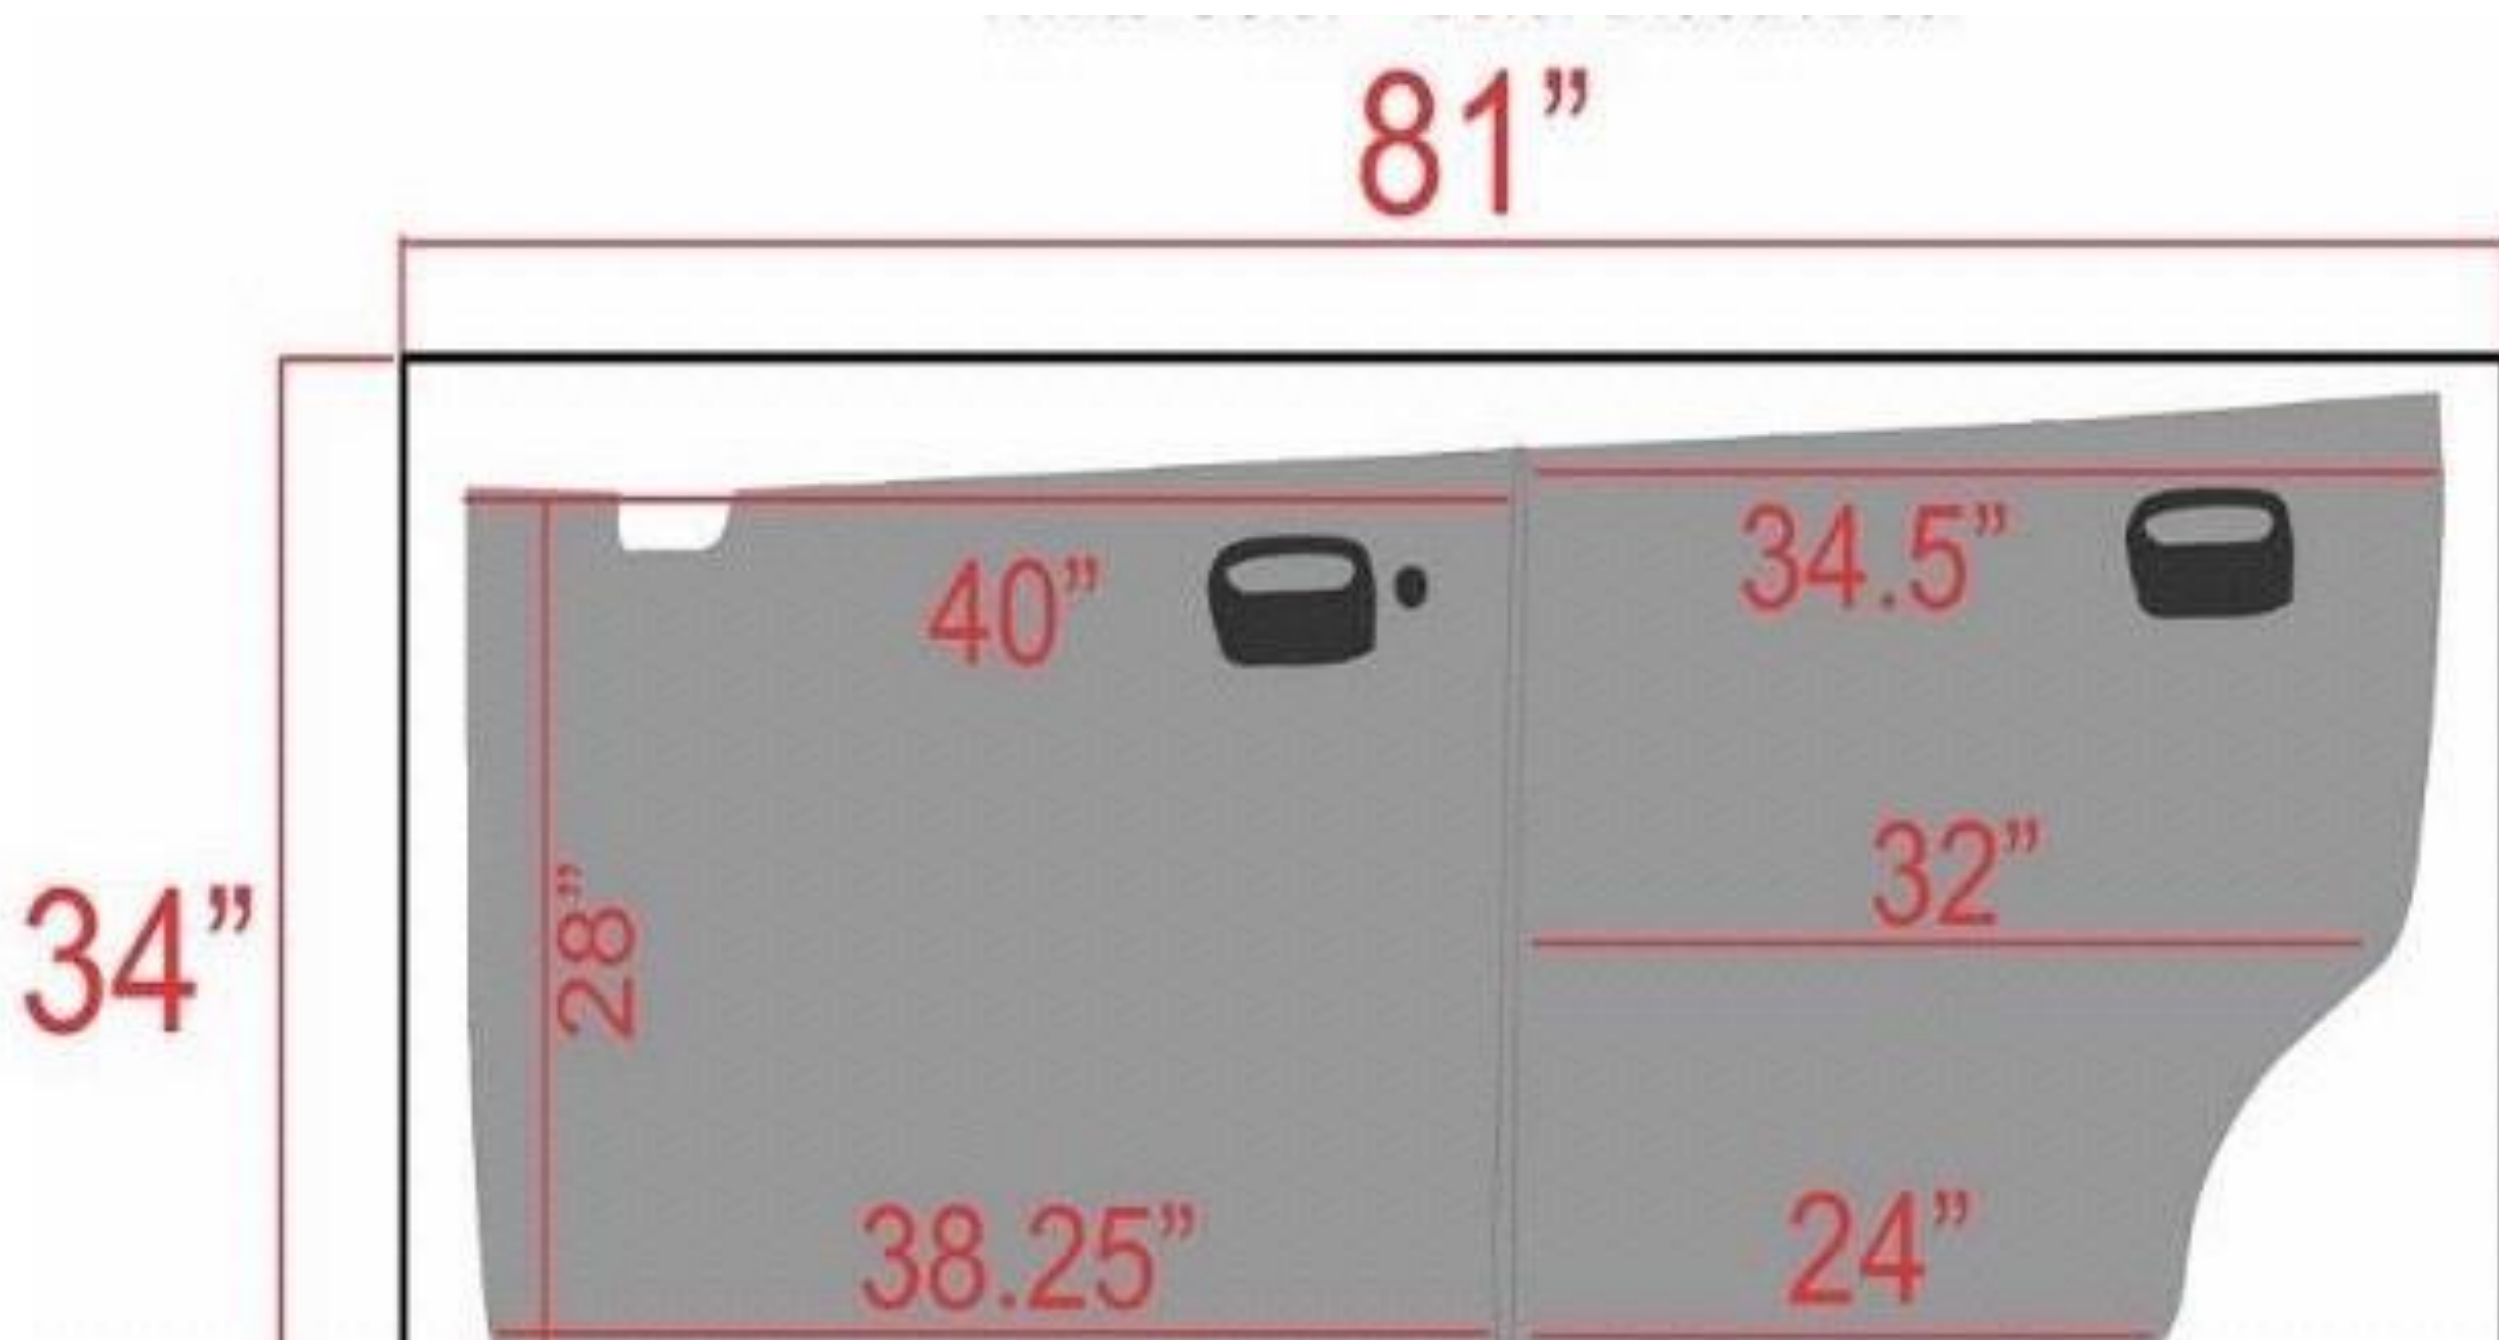

Format required to print size

- 1) PSD , Ai , EPS , CDR or (PSD Which is exported from CDR so that when it imports in coral the layers are visible)
- 2) The File resolution should be created on 300 resolution. (Also if images are used should be high res / 300dpi)
- 3) Its the print file so we need it into the CMYK mode.
- 4) If any external images used in any file please mail it alone with the main file.
